

11,000 PAYING SUBSCRIBERS, - - - EDITION, 15,000

POWER covers that branch of mechanics which includes steam engineering and all forms of development and transmission of power. Its descriptive columns represent new devices, and its editorial columns contain contribu-

tions from men of practical experience; both departments fully illustrated. Monthly, \$1.00 a year. No need to use fifty different papers to advertise steam and power appliances. Use one and cover the whole field. To use miscel-

laneous trade papers is to waste money. "POWER" makes it possible to place your business before the man in charge of the steam or power machinery in all branches of manufacture by the use of one paper.

113 Liberty St.,
New York City.
Oct. 19. 1887.

Hon. Daniell M. Fox,
Superintendent of the Mint,
Philadelphia, Pa.,

Dear Sir:

Can you furnish me with photographs or cuts of the new steam plant in the Philadelphia Mint? or with a description of the different parts of it? I should like to illustrate it in Power.

I am, very respectfully,

A. D. Risteen,
Ed. Power.
